APPLICATION FOR A JUNIOR WEB DEVELOPMENT / CLOUD / DEVSECOPS ROLE

Lagos, Nigeria | beccaogbeide@gmail.com | +234 7063 504 751

Dear Hiring Manager,

I am applying for a junior opportunity in web development, cloud, or DevSecOps. I am developing my skills through structured learning and practical projects, and I am looking for a team where I can contribute, learn from experienced colleagues, and take on responsibility as my skills grow.

Through my TAMP projects, I have built and maintained responsive websites, used Git and GitHub to manage changes, deployed sites with Cloudflare, and practised basic CI/CD and security checks. I am also learning cloud services, Docker, and Kubernetes fundamentals. This hands-on work has helped me build confidence in troubleshooting, careful implementation, and documenting changes.

I know I still have much to learn, but I bring curiosity, reliability, attention to detail, and a willingness to ask questions and act on feedback. I would value the opportunity to support your team with day-to-day development tasks while continuing to improve my technical skills.

Thank you for considering my application. I would welcome the opportunity to discuss how my current experience and learning mindset could contribute to your team.

Kind regards,
Rebecca Ogbeide
